PART ONE:

THE INTRODUCTION

CHAPTER ONE:		2.4. Views on conditions and effects of demographic growth	16
APPROACH	3	2.5. The growth of towns in the light of the functional component of urbanization	19
CHAPTER TWO:		a) Traffic as an element of urban environment	26
THE THEORETICAL VIEWS OF THE SUBJECT	9	b) Housing as an element of the functional component of urbanization	28
2.1. A review on various approaches to society and interpretation of historic process	9	c) Work activities as a determinant of urban environment	29
2.2. General views on urbanization	10	2.6. Views on space as a condition in the process of urbanization	33
2.3. Views on urban environment in historic terms	14	2.7. Space as an object of man's conscientious action	36

PART TWO:

CONDITIONS OF URBAN ENVIRONMENT GENESIS ON CONCRETE EXAMPLES

INTRODUCTION	49
--------------------	----

CASE STUDY 1:

INDIA

CHAPTER THREE:		3.3. The colonial era in India eneral	58
INDIA IN THE LIGHT OF THE DEMOGRAPHIC COMPONENT OF URBANIZATION	55	3.4. The increase of population of Calcuta	59
3.1. Natives and the settlements of Arians	55	3.5. Migration flows: the last decade of the colonial era in india	60
3.2. Arrival of Muslems and changes	57	3.6. The trend of urbanization of india under the conditions of the independent development	62
		3.6.1. Total increase of population	62

3.6.2. Degree of the urbanization - country level	62	CHAPTER FOUR:	
3.6.3. Degree of concentration	63	FUNCTIONAL CONDITIONS OF URBANIZATION	85
3.6.5. Urban and rural population: demographic differences	64	4.1. First known settlements: organization and function	85
a) Sex and age structure	64	4.1.1. Economic basis of existence: the case study of old settlements	85
b) Marriage status and urbanization	65	4.1.2. Socio-political might as a factor of the old settlement	
c) Size and structure of households (1961)	66	development.....	86
d) Characteristics of dependence within population (1961)	66	4.1.3. The advent of feudalism and moguls	88
e) Literacy in urban and rural environments	67	4.1.4. Colonialism and functional condition of development	88
f) Vital characteristics of population: Differences between		a) Economic and political basis of colonial urbanization:	
urban and rural population	67	the role of activities.	88
3.6.6. Characteristics of migrations: country level	68	b) Role and meaning of traffic and trade	89
3.6.7. Migrations and changes in urban environment: demographic		4.2. Functional conditions and influences: India in era	
differences between urban existing and immigrant population ...	71	of independent development	89
a) Sex structure	71	4.2.1. Economic conditions and influences on urban environments ...	89
b) Educational levels by type of population	71	b) Role and meaning of agrarian activities in the process	
c) Structure of employment	72	of urbanization	93
3.7. The trend of West Bengal urbanization	72	c) Role and meaning of industry in the process of urbanization ..	94
3.7.1. Increase of population	72	d) Role and meaning of trade and commercial activities on	
3.7.2. The degree of urbanization in West Bengal	73	development of urbanization	98
3.7.3. Degree of concentration of urban population according	73	4.2.2. Traffic conditions and influences as indicators of urbanization	100
3.7.4. Other characteristics as indicators of the W. Bengal		a) Railway network	100
development	75	b) Road traffic	100
3.8. An example of the Calcutta urbanization: the independent		c) Air traffic	101
development patern	75	d) Ports and urbanization	101
3.8.1. Increase of population	75	c) Traffic in urban environment: example of Calcutta	102
3.8.2. Characteristics of migration: calcutta pattern	77	4.2.3. Water supply and sanitary conditions	105
3.8.3. Demographic characteristics of Calcutta.	79	4.2.4. Socio-cultural conditions and influences	106
– Number and structure of households	79	4.2.5. Social investments and educational profiles	107
– Sex structure	79	4.2.6. Health standard	108
– Age structure	80	4.2.7. Role of political factors in the process of urbanization	
– Language composition	80	of India	108
– Marriage status: example of Calcutta population of over		4.2.8. Housing as a functional activity	109
14 years of age	81		
– Literacy of population	81	CHAPTER FIVE:	
3.9. Conclusion on demographic conditions and influences to the		SPATIAL - ECOLOGY AND CONDITIONS	117
formation of an urban environment	82	5.1. Climatic conditions and relief.....	117
		5.2. The biosphere	119
		5.3. Water and water streams, rivers	120

CASE STUDY 2:

LIBYA

CHAPTER 6:		6.4. Era of Turkish domination	126
DEMOGRAPHIC CONDITIONS AND INFLUENCES	123	6.5. Colonial period	127
6.1. Natives and ancient settlement	123	6.6. Degree of urbanization: period of occupation	127
6.2. Settlement of muslims and changes first phase	124	6.7. Internal migrations and emigrations	128
6.3. Islamic era: the second phase	125	a) Rural to rural	128
		b) Rural to urban migration	129

6.8.	Colonization and changes	130	7.1.2.	Socio - political might as a factor of development of ancient towns	153
6.9.	Trend of urbanization of global Libya: era of independent development	131		Era of colonial - pre-industrial urbanization	155
6.9.1.	Total increase of population	131	7.1.3.	Role of primary and secondary activities	155
6.9.2.	Degree of urbanization	131	7.1.4.	Socio-political power and urbanization	157
6.9.3.	Degree of urban concentration per total population	132	7.1.5.	Role of traffic	158
6.9.4.	Table 4: The degree of urban concentration according to the total urban population	133	7.1.6.	Role and meaning of trade	159
6.9.5.	Demographic differences of urban and rural population	133	7.1.7.	Role of Islam and relations village - town	159
	a) Sex and age structue	133	7.1.8.	Education and culture	160
	b) Marriage status and urbanization	134	7.1.9.	Housing and communal activities and urbanization	161
	c) Size of households	135	7.2.	Functional conditions and influences: independent era	161
	d) Literacy of population	136	7.2.1.	General	161
	e) Characteristics of dependent population	137	7.2.2.	Changes or role and meaning of agricultural production and urbanization	165
6.9.6.	Characteristics of migration: country level	137	7.2.3.	Role and meaning of industry and urbanization	168
	a) Types of migration	137	7.2.4.	Conclusion on role of agriculture and oil industry on the process of urbanization	170
	b) Motivations and causes of migrations	138	7.2.5.	Traffic as a factor of urbanization	170
	1. Migrations and the environmental conditions:	138		a) Sea-transport activities	171
	2. Socio-cultural factors	138		b) Air traffic	171
	3. Non-economic migrations	139		c) Road traffic	172
	4. Economic motivated migrations.	140		d) Improvement of road network	173
6.9.7.	Migrations and changes of environment	140		e) Sea - ports	174
	a) Influence of migration on rural environment	141		f) Air ports	174
	b) Influence of migrsation on urban environment	141	7.2.6.	Trade and urbanization trade as an activity	174
	c) Influence of migrations on migrants	142		a) General markets	175
6.10.	Trend of urbanization by provinces	142		b) Shops	175
6.11.	Trend of urbanization - regional level	143		c) Supermarket	175
	MANTAKAT TRIPOLI	143		Trade as a factor of employment	176
	MANTAKAT MISRATA	144	7.2.7.	Socio - cultural aspect and urbanization	176
	MANTAKAT HOMES	144	7.2.8.	Development of education and effects	178
	MANTAKAT ZAWIA	144	7.2.9.	Health standard	178
	MANTAKAT GHARIAN	144	7.2.10.	Socio-political power and urbanization	180
	MANTAKAT BENGHAZI	146	7.2.11.	Housing as a result, condition and object in process of urbanization	182
	MANTAKAT DERNA	146		a) Needs of dwelling development - country-wide level	182
	MANTAKANTEL KHALIG	146		Accumulated needs	182
	MANTAKAT SEBHA	146		1. Dwellings needed no reduce density:	183
	MANTAKAT BEIDA	147		2. Dwellings needed to replace those which can't be repared:	183
6.12.	Degree of urbanization and growth rates of population of characteristic groups by achieved levels at certain time	147		3. Dwellings needing improvements	183
6.12.1.	Degree of urbanization and qualitative changes of population	148		b) Dwellings needs in urban and rural environments	183
6.13.	Conclusion on demographic conditions and influences on formation of urban environment	149		c) Orientation considerations on current needs of dwellings	185
				d) Way of satisfaction of housing needs	185
				Private sector	185
				State - housing model	187

CHAPTER SEVEN:

FUNCTIONAL CONDITIONS

7.1.	A review of historic development	151
7.1.1.	Economic basis of development of ancient settlements.	151

CHAPTER EIGHT:

ECOLOGICAL-SPATIAL CONDITIONS

8.1	Climatic conditions	189
-----	---------------------------	-----

CASE STUDY 3:

TANZANIA

CHAPTER NINE:

DEMOGRAPHIC CONDITIONS AND INFLUENCES	193
9.1 Native population and arrival of Arabs	193
9.2 Colonial era	193
9.3 Urbanization trend of global society	195
9.3.1 Total growth of population	195
9.3.2 Level of urbanization of Tanzania	196
9.3.3 Level of urban concentration in regard to the total population in the country	196
9.3.4 Level of urban concentration in comparison to the total urban population	197
9.3.5 Demographic differences between urban and rural population of the country	198
a) Sex and Age Structure	198
b) Marital Status	199
c) Size and Structure of Households: Differences	200
d) Proportion of the Maintained Population	200
e) Differences in Central Features	201
f) Literacy of the Population	201
9.3.6 Characteristics of migration: at the level of the country	202
9.3.7 Migrations and changes in the urban milieu: demographic differences between the urban autochthonous population and the newcomers	204
a) Differences in Age Structure	204
b) Differences in the Sex Structure	205
c) Migration and Marital Status	205
d) Migration and Education	206
e) Influence of Migration on Vital Characteristics of Urban Population	207
9.4 Characteristics of the urbanization on a regional level 1967 ...	208
9.4.1 Urbanization coefficient	208
9.4.2 Regional mobility of the population	209
9.5 The urbanization trend: local level	209
9.5.1 Growth rates of towns	209
9.5.2 Volume of migration fluctuation in towns	210
9.5.3 Demographic specifics of some towns	210
9.6 Conclusion about the influence of the urbanization process on the structural changes of the population in rural and urban environments	211

CHAPTER TEN:

FUNCTIONAL CONDITIONS	213
10. 1 Historical conditions of development to colonization	213
10.1.1 Economic foundations of development	213
10.1.2 Socio-political conditions	213
10. 2 Colonization and changes	214
10. 2.1 Social and economic conditions and urbanization	214
10.2.2 Traffic as a factor of urbanization	214
10.2.3 Other functional changes	215
10. 3 Independence era	216
10.3.1 General review	216
b) Annual income according to household's size and environment	218
c) Annual income in cash per capita according to household's size	218
d) Income in cash according to income source and environment	218
10.3.2 Change of role and meaning of agrarian activities in the urbanization process	219
10.3.3 Changes of role and importance of secondary activities	221
10.3.4 Conclusion about the role and importance of agriculture and industry on the process of country urbanization	222
10.3.5 Traffic as an element of conditions improvement	223
10.3.6 Trade as a factor of urbanization	224
10.3.7 Socio-cultural conditions and influences	224
10.3.8 Development of education and urbanization	225
a) Elementary education	226
b) Secondary education	226
c) University education	226
d) Education of educational staff	226
10.3.9. Health care standards	226
10.3.10. Socio-political factor and urbanization	228
10.3.11. Housing conditions and achievements	229
a) The lack of apartments in urban environment	229
b) Low apartments' standard	229
c) Contradictory situation in the politics of housing rent	229

CHAPTER ELEVEN:

ECOLOGICAL CONDITIONS	235
11.1. Climate conditions and relief	235

PART THREE:

URBAN ENVIRONMENT AS AN EXPRESSION OF CONDITIONS, HUMAN ORGANIZATION AND SPACE ARRANGEMENT

CHAPTER TWELVE:

INDIA	241
12.1 Space-physical effects as an expression of historical conditions	241
12.2 Urban environment in the era of independence	246
12.2.1 Disposal of population and settlements	246
12.2.2 Population densities of the country	247
12.2.3 Form of settlements as a manifestation of natural and functional conditions and densities	247
a) Global Level.....	247
b) Calcutta example: form as an expression of functions	251
c) The form of settlement as esthetic expression of human needs, feelings and social values	257

CHAPTER THIRTEEN:

LIBYA	261
13.1 Human organization and space structure in historical framework	261
13.1.1 Human space organization	261
13.1.2 Human formation of space	264
13.1.3 Changes in human space organization since the Arabian settling until the Turkish occupation	267
13.1.4 Modifications in human forming of space	270
a) Influence of pre-Islamic urbanization on early Islamic-Arab cities	270
b) Urbanization and space-physical and social morphology of cities and villages	270
- Residence house - basic city cell	270
- Anatomy of Libyan- Arab city	271
c) Elements of urban forms of an early city	274
Focal points	274
Cell form	274
Silhouette	274
Asymmetry of plan and effects	274
Purity of an urban profile	274
Business atmosphere	275
Optic vision in motion	275
Sensation of awaiting	275
Change of level	277
Details	277
Functional tradition: calligraphic forms	277
Wells	277
c) Conclusion on characteristics, organization and shaping of the space in the process of first phase of Islamic urbanization.....	277
13.1.5 Second phase: period of Turkish and Italian governing	278

a) Relation of natural and created elements of space in the process of urbanization	278
b) General characteristics of space organization of cities and villages in this period	279
c) Architecture and pre-industrial urbanization	282
- Housing architecture	282
- Coastal house – “HAUSH”	282
- Desert house	283
b) Mosque architecture	283
- Architecture of markets, bazaars – “suqs”	283
13.2. Urban environment in the era of independence	285
13.2.1. Distribution of population and settlements	285
13.2.2. Density of population in the country	286
13.2.3. Form of settlement as a manifestation of natural conditions, functional activities and density	286
a) Typology of cities according to centrality	286
Conclusion (of the test of centrality of the existing settlements)	288
b) Classification of Libyan cities pursuant to their function	288
c) Classification of Libyan cities according to their function/ location	289
d) Model of arrangement of cities in Libya according to the “Rule of rank size”	292
13.2.4. Changes in human formation of space influenced by the technological era	293
a) General review	293
b) Physical shapes	293
c) Traffic system that is being created today, is very significant as form constructor	295
- Effect of combination of straight and curved traffic system	295
- Effects of orthogonal model	295
d) Other effects	295
e) Buildings (housing and civil engineering) as an element of urban formation of space	296
f) Structural forms	296
13.2.5. Changes of quality characteristics of architecture	297
a) General review of changes	297
b) Changes in housing architecture	298
Arab house – “haush” in villages	298
“Haush” in cities	298
“Haush” in desert territories	298
Villas	299
Collective buildings	300
c) Mosques as expression of new influential factors 3	00
d) Administrative architecture	302

CHAPTER FOURTEEN:

TANZANIA	305	a) Working	317
14.1 Urban environment as a result of historical conditions	305	b) Commerce	317
14.2 Urban environment as an expression of changes in the conditions of independence	310	c) Activities in the residential area of the town	318
14.2.1 Distribution of population and settlements in the country	310	14.2.5 Urban environment as an expression of the pupolation density	318
14.2.2 Distribution of industrial capacities	310	14.2.6 Urban environment as an expression of physical qualities of inhabited entireties	325
14.2.3 The shape of the town as a manifestation of function: Dar es Salaam, for example	312	14.2.6 Micro scale of urban settlements	329
a) Determined Forms as the Entirety	312	a) Traditional House in the Settlement System	329
b) Economic Basis and Growth Factors	312	b) New Swahili units in the planned settlement	329
c) Natural and Physical Aspects	313	c) African Multiple Dwelling Units	329
d) Transportation and Employment Aspects	313	14.2.7 Architectural concept: dwelling forms	329
e) Social and Cultural Aspects	317	a) Old Swahili House	329
f) Service Aspects	317	b) New Swahili House	329
g) Visual Aspects	317	c) African Multiple Dwelling Units	330
14.2.4 Urban environment as an expression of macro model activity	317	14.2.8 Constructive system	330

PART FOUR:

CONCLUSION

CHAPTER FIFTEEN:

POPULATION DEVELOPMENT AND URBANIZATION: CHANGES AND EFFECTS	337
15.1 General comparative view of historical trends	337
15.2 Population growth, growth rate and vital characteristics in the conditions of independence	338
15.3 Level of urbanization	339
15.4 Demographic differences between urban and rural population	339
15.5 Characteristics of migration	340

CHAPTER SIXTEEN:

FUNCTIONAL ASPECTS OF URBANIZATION	341
--	-----

CHAPTER SEVENTEEN:

SPACE-PHYSICAL COMPONENT OF URBANIZATION	345
17.1 The role and significance of natural conditions	345
17.2 Space-physical effects	346

CHAPTER EIGHTEEN:

SYNTHESIS OF IMAGES OF CHANGES AND EFFECTS	349
--	-----

CHAPTER NINETEEN:

POSSIBLE FUTURE HORIZONS OF URBANIZATION	353
19.1 Significance of the population growth rate	353

19.1.1 World trends	353
a) India	354
b) Libya	356
c) Tanzania	358
19.2 Need of urbanization policy	359
19.2.1 The problem of urban-rural "continuum"	359
19.2.2 The problem of territorialization of the urbanization	360
19.3 The needs of human urban areas	363
19.3.1 Human needs and values in the settlement plans	363
a) Physical Needs	363
b) Intimacy and Protection	363
c) The Unity of All Phases of Life	363
d) The Settlement Awareness	364
e) Social Values	365
f) Cultural Context	365
g) Emotional Factors	365
h) Synthesis of Forms	366
19.3.2 Principles of a successful urbanization project in urban surroundings	366
